Good Building Record for First Half of Year

There is no doubt but that Sierra Madre is growing. From figures compiled by George H. Cox, City Building Inspector, for the chamber of Commerce, it is quite evident that there is a great deal of building activity in Sierra Madre.

Permits were issued for \$200,000.00 worth of new construction in the first six months of the year, exclusive of the first twelve days of the year when there was no building ordinance.

The following permits have been issued since July 1st.

| | |
|---|-----------|
| C. B. Reas, 223 San Gabriel Court, addition | \$ 150.00 |
| H. M. Berkley, Sturtevant Road, dwelling | 1200.00 |
| George Leaming, Woodland Drive, Garage | 100.00 |
| J. J. Samman, 78 E. Highland Store | 250.00 |
| H. E. Sieffert, 205 N. Hermosa Dwelling | 1000.00 |
| Martha Lichnog, 84 Esperanza Addition | 250.00 |
| E. M. Bruce, S. M. Canyon, Addition | 100.00 |
| Total | \$3050.00 |

MISS BAYNE CANDIDATE IN TIMES CONTEST

Miss Eleanor Bayne has entered the race for one of the auto prizes in the Times subscription contest. She is in the district including Sierra Madre and Pasadena. Subscriptions given to her will not interfere with the business of Frank Spencer, local agent for the Times. Miss Bayne has addressed to her friends a little rhyme with which it is said another newspaper contest was once won:

Only three wee cents a day
For the L. A. Times will pay.
Considering the service rendered
There's nothing so cheaply tendered.
Its safe and sane variety
Delights the entire family
Of ten or eight or two or three.
Then's worth the price of kindling,
see?

Please give to me the gracious boon
Of your subscription very soon.
I'll win the choicest of those cars
And take you, maybe, up to Mars.

A RARE MUSICAL TREAT

On next Sunday evening, July 16th, at 7:30 at the Church of the Ascension Mr. William C. Heller, a very distinguished organist of Boston who is spending a few days in Sierra Madre will render the following program.

| | |
|----------------------|----------|
| Grand Chorus | Dub |
| Melodie | Dubois |
| Allegro | Guilmant |
| Communion in G | Batiste |
| Allegretto Cantabile | Wely |
| Maestose | Weley |
| Lullaby | Wider |
| Finale | Wider |

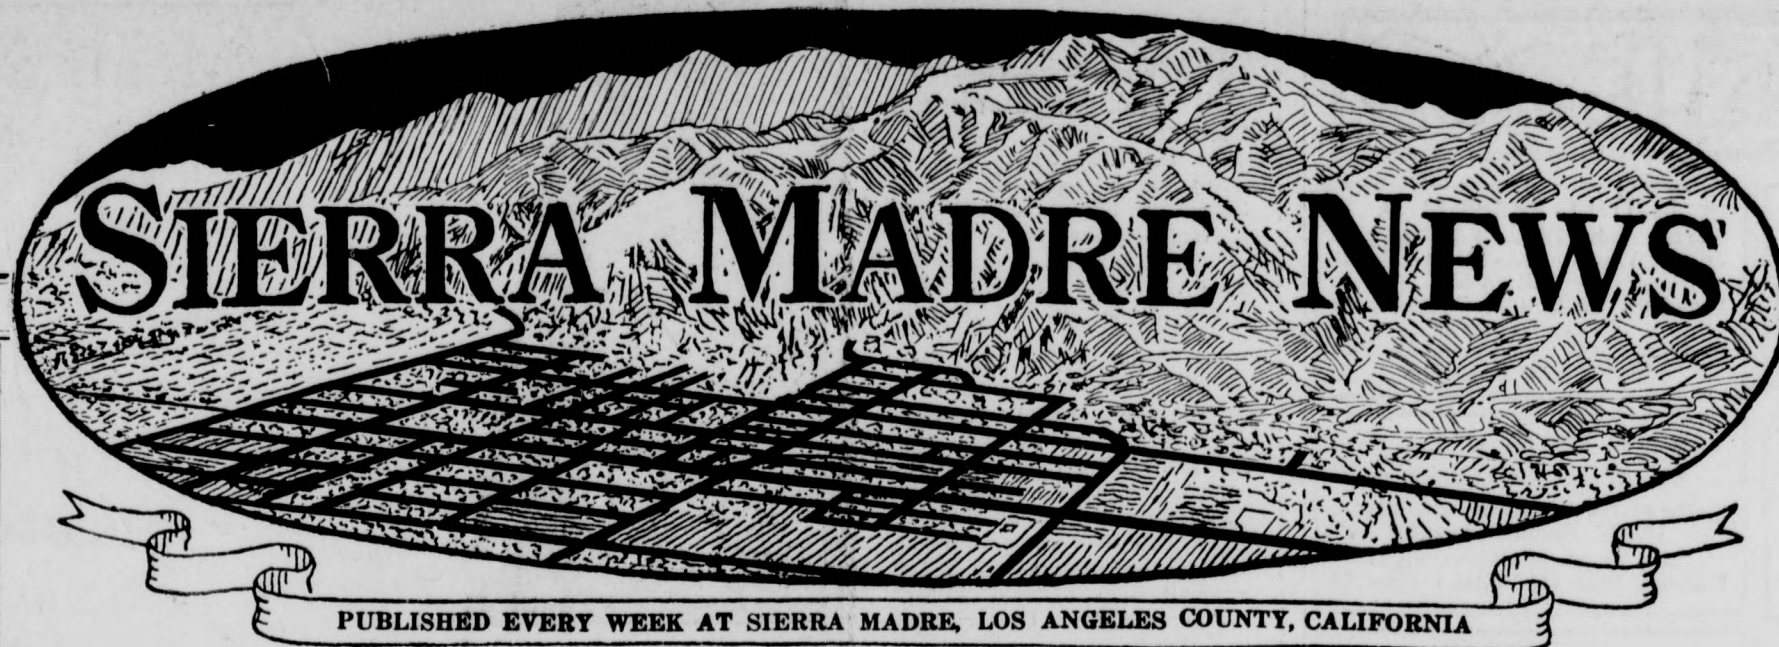

This is a rare opportunity for lovers of music to have a real musical treat. All are very cordially invited to come. Silver offering will be taken, the proceeds devoted to the plans of the women in connection with the parish house.

CHARLES BENNETT INJURED IN MOTOR TRUCK SMASH

Charles Bennett, the 18-year old son of Mr. and Mrs. C. H. Bennett of 473 Auburn Ave., was seriously injured in a motor truck accident in Los Angeles Tuesday afternoon. He was driving a delivery truck at Ninth and Central and lost control when the steering knuckle broke, causing the truck to strike a street car ahead, then rebound against an auto following, then swing around against a telephone pole. Young Bennett suffered five broken ribs, a fracture to the skull and internal injuries which it was feared might prove fatal. He was taken to the Pacific Hospital and at last reports his condition was reported to be entirely favorable.

CANDIDATES TAKE MASTER MASON DEGREE

John K. Newton and Bruce McGill were raised to the degree of Master Mason at a meeting of Sierra Madre Lodge, F. & A. M., on Tuesday evening. There was an unusually large attendance. At the close of ceremonial work refreshments were served, this being the last meeting until October, with the exception of the stated meetings.

HORRIBLE ACCIDENT! BLOOD FLOWS FREELY

Small Boys Scattered About Wrecked Auto Arouse Sympathy of the Passers-by

Gory looking small boys scattered about the landscape in the vicinity of a wrecked auto on West Central Ave., caused many a heart to skip a beat on Tuesday. The boys were in various positions, apparently just as they had fallen after the smash, unconscious or maybe killed.

Persons approaching with bated, full of sympathy and ready to render any aid possible, were so suddenly disillusioned that they did not know whether to be glad or sorry their good offices were not needed. For instead of groans they were greeted with giggles, then with merry ha ha's, not to say loud guffaws. The blood was nothing but paint or fruit juice. The boys had made up their little play to suit the stage setting afforded by a wrecked car which had been standing on the street since Sunday.

The car belonged to Charles Corbin and was driven by a relative who lost control on making the turn from Sierra Madre Ave., to Central and collided with the curb, breaking a front wheel and otherwise damaging the running gear.

SISTER'S DEATH CALLS C. F. STANLEY EAST

Word has been received of the passing of Miss Mary L. Stanley at Chautauqua, N. Y., on Monday. Miss Stanley passed the winter in Sierra Madre at the home of her brother, C. F. Stanley of 126 E. Mira Monte Ave., as she had a number of previous winters, going east in May. Mr. Stanley received word last Friday that she was not expected to live long. He left for the east on Sunday morning, hoping to reach her before she passed away. However, a telegram arrived on Tuesday saying that she had gone. The burial will take place at the old family home, New Britain, Conn., Mr. Stanley going there for the funeral. Miss Stanley was a quiet, unassuming little woman, deeply interested in religious and philanthropic affairs, and greatly loved by many people for her acts of kindness and generosity. She had a home on Lake Chautauqua and had spent her summers there ever since the founding of the Chautauqua institution.

FRIENDS WERE NOT WHAT THEY SEEMED

Edwin Ward Jr., left on Tuesday for New York, to be absent several months. One of his last acts before leaving California was to undertake the arrest of a whole crowd of people who appeared to him to be very careless in their handling of a bonfire in the San Gabriel riverbed. He had driven to Azusa with friends Monday evening on an errand and on the return the bonfire was noticed. Someone remarked that the fire looked dangerous and Ed concurred.

Their auto was stopped and with a little encouragement from his friends, Ed started to see what could be done about the fire. As he approached the group about the fire and was about to remonstrate, he was greeted with shouts of more friends, and he began to realize that he had just been brought to the rendezvous of a farewell surprise party in the form of a wiener roast.

Mrs. L. E. Steinberger was the hostess at a social gathering of the ladies of the Eastern Star chapter at her home on Mariposa Ave., Wednesday afternoon. Delightful refreshments were served, and a pleasant afternoon was spent without a thought of ritual work or anything more serious than cards and sewing.

Mrs. Rudolph Hartman entertained a few friends informally Thursday evening in honor of Mrs. Robert L. Clark of El Segundo.

Mr. and Mrs. Robert L. Clark of El Segundo are enjoying their vacation in Sierra Madre.

Popularity of Public Library Shown by Annual Report

July 1, 1921-June 30, 1922.

To the Library Board of Trustees:

The test of usefulness of our public library is proven by the number of people who actually use the books in the library and in the homes of Sierra Madre. Five hundred and seventy are at present active borrowers of our library and during the year which ended June 30, borrowed for home reading 24,593 books, an increase over the preceding year in the use of books of 3,957, a gain of 16 per cent. An increasing library spirit in our city is most desirable, and we can best achieve this through a constantly increasing collection of books and a more adequate personal service to our patrons.

An effort has been made to make the library more attractive and convenient by the rearrangement of library furnishings and by reshelving the books so that they are more accessible.

The work with students has been one of the chief factors in reference work, covering many subjects, such as material for papers, bibliographies, and critical estimates of books. There has also been some important reference work done with the adults and children. It is hoped that as our reference collection grows the demand will be created for more work, not only among the patrons and students, but especially among the children—who are really the ones to whom we look for our future citizens and who must have the best we can give both in service and guidance.

It is always interesting to note the subjects of the books which are in greatest demand for home reading. They follow the current of thought regarding public questions, prominent personages, and popular discussions of art, literature, and science. Among the special subjects most widely read this last year have been books of travel, biography, education, health, and psychology, besides the many subjects read through the large collection of magazines.

The Los Angeles and Pasadena public libraries have been most helpful in loaning books which could not be supplied for our patrons from our collection.

A progressive step has been taken this year in installing a new system by which books are drawn from the library. When registering, the borrower is given an identification card of pocket-size. When borrowing books from the library the reader presents this card at the desk and the librarian charges the books by the number on

the identification card instead of by the name of the borrower as was heretofore done. The chief advantage of this system is that more adequate service can be given.

During the year approximately 100 books have been rebound and 271 have been worn out and discarded. As the expense of rebinding is quite an item care has been taken not to rebind a book unless it is still a valuable or useful addition to the library.

Work with the children has developed greatly in the past year and it is hoped that we will be able to meet the needs of this growing demand with adequate and well selected material. The total circulation of children's books this year has been 4,803, a gain of 428 over the preceding year.

I am happy to have this opportunity to express my appreciation and gratefulness to the Board of Trustees for their interest and full cooperation in the things that stand for a fuller development of library facilities; also to the Sierra Madre News, which has been most helpful in giving publicity to general library news and in printing lists of books added to the library; also to the patrons who have been so generous with flowers and so kind in many other ways.

Respectfully submitted,
ELSIE W. ROGERS, Librarian.

American Library Association Uniform Statistics

Annual report for the year ending June 30, 1922.

Population, 2600 (approximately.)

Free for lending, free for reference. Number of days open during year, 304; hours open each week for lending, 36; hours open each week for reading, same.

Total number of staff, one full time attendant.

Total number of volumes July 1, 1921, 8488; 420 added by purchase, 190 added by gift.

Number of volumes withdrawn, 293. Total number of volumes June 30, 1922, 8805.

Total number of pamphlets, 2091; total number of maps, 9.

Loaned for home use, 24,593, of which 13,165 were fiction.

Total number of registered borrowers, 570 (entire registration of borrowers since April, 1922.)

Registration period, three years.

Number of periodicals currently received (including newspapers,) 60.

Number using reading rooms, no count kept.

Expenditures, \$2413.94 (Petty cash not included.)

BANK SHOWS SPLENDID GAIN FOR QUARTER

Local Business Conditions Shown To Be Excellent by Comparative Figures

Marked gains in deposits and in loans and investments were made by the First National Bank during the quarter just closed, according to figures prepared by Cashier H. E. Allen. The statistics speak well for local business conditions and for the continued growth in public appreciation of the local bank.

Deposits on June 30 were \$427,922.57, and on March 31 they were \$386,114.23, a gain of \$41,808.34. This amount includes a deposit of funds of the new Sierra Madre Savings bank amounting to \$21,324.68. Deducting this amount from the total gain leaves a net gain in the deposits of the First National Bank of 20,473.66.

The way in which funds deposited in the home bank become available for local loans and investments is strikingly shown. Total loans and investments June 30 were \$318,808.12, and on March 31 they were \$298,471.59, a gain of \$20,336.53. It is seen that the gain in loans and investments is almost exactly equal to the gain in deposits.

During the quarter the bank paid the usual 12 per cent dividends to stockholders. In addition, the directors maintained the conservative policy of writing off liberally from its equipment account, and at the same time made an addition to the item of undivided profits.

EQUAL PAY IS URGED FOR LETTER CARRIERS

The Chamber of Commerce has taken up the matter of securing an advance in pay for the local letter carriers who now receive only \$1200 per year, the same as when the post office was in the third class. It is said carriers at other second class offices receive \$1400 and the Chamber of Commerce has adopted resolutions asking that the local men be placed on an equal footing.

It is pointed out that the hillside situation and amount of territory to be covered make the duties of the local carriers so difficult that it may not be possible to retain the present proven carriers or to fill their places at present pay. Messrs. Thompson and Howard are recognized as having given faithful service deserving of the highest pay possible under the regulations. Copies of the resolutions were sent to the senators and congressmen as well as to the postmaster general.

Mrs. A. D. Hawks, Pioneer Resident, Is Called to Rest

Mrs. A. D. Hawks, a resident of Sierra Madre for thirty-five years, passed away on Saturday at the age of eighty-five years. Her passing removes another of the well known figures of the period in which Sierra Madre developed from a small village and in which she had an active part.

Mrs. Hawks was born in Attica, N. Y., in 1837 but as a young child was taken by her father to live in Oconomowoc, Wis. In 1865 she was married to Ami D. Hawks and they settled at Delafield, Wis., on a farm left by Mr. Hawks' father. Five children were born to them, three of whom survive, Mrs. Laura Stevenson, Miss Daisy Hawks and J. N. Hawks, as well as three grand children and two great grand children. In 1876 Mr. and Mrs. Hawks removed to San Francisco where Mr. Hawks was associated with his brother Nelson Hawks, in the old Pacific Type Foundry business. They came to Sierra Madre in 1887 and since that time Mrs. Hawks has lived in the home on Grand View Ave. Mr. Hawks retired from active business in 1907, his health failing until his death in 1911. Mrs. Hawks continued in good health until last year, when the infirmities of advancing years became apparent.

Throughout their lives in Sierra Madre Mrs. Hawks and her husband were identified with the community's best life and interests. Her friendly hospitality, her devotion to her family and charitable activities are fresh in the memory of her many friends.

Funeral services were held Monday morning in the Church of the Ascension, where Mr. and Mrs. Hawks are remembered for exceptional devotion and service.

CARL YOUNG CALLED AFTER LONG ILLNESS

Well Known Young Business Man Succumbs After Brave Fight for Life

Carl Young, a resident of Sierra Madre for several years past, succumbed to a long illness on Sunday morning at his home on North Adams St. Previous to coming to Sierra Madre, Mr. Young was manager of the Illinois Electric Co., a large wholesale concern of Los Angeles. He was a keen minded business man, held in high estimation by his associates. His capacity for making friends and his brave fight for health made him very popular in Sierra Madre. He had a pleasing voice and excellent musical talent, and in earlier years took part in many musical activities, especially church music. He was a member of the Congregational Church. Mr. Young is survived by his wife and two young sons, Jack and Junior.

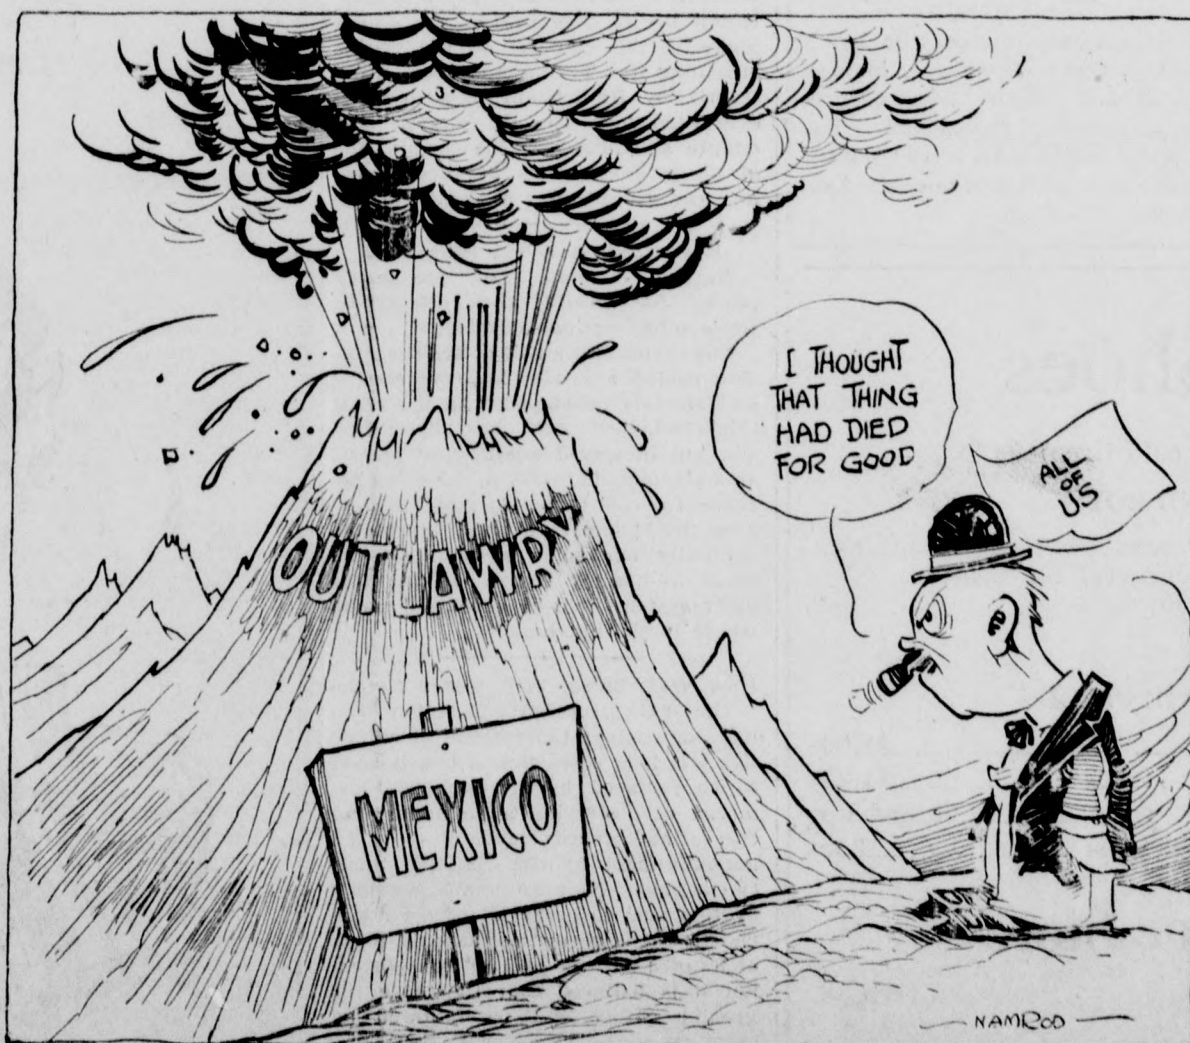

Funeral services were conducted on Tuesday afternoon at the A. T. Gay Undertaking parlors. Dean Shaw delivered an inspiring and comforting address. A solo was sung by Mr. Tibbitts, a prominent Los Angeles singer and friend of Mr. Young, with accompaniment by Mrs. George B. Morgridge.

EXTREMES OF SIZE SOWN IN HEN EGGS

Mrs. O'Bannon reports that her Rhode Island Red hens are trying to bring fame to Sierra Madre, and in proof of her statement has brought to the Chamber of Commerce office a sample of what they are doing. The egg is on exhibition in the window of the Chamber of Commerce office and measures 7 and 1-8" in smaller circumference and 8 13-16" in larger circumference. By way of comparison the Sierra Madre Dairy submits an egg laid by a Plymouth Rock hen recently that has not as yet acquired the Sierra Madre spirit.

CASHIER INGRAHAM RECOVERS

Cashier W. H. Ingraham of the Sierra Madre Savings bank returned to work Wednesday after being laid off a week on account of illness. During his absence President Allen and the rest of the bank force were kept more than busy by the rush of work at the end of the quarter, coupled with calls for statements of condition both for the National and Savings banks, and the rush of patrons to open up new accounts in the latter.

HOW

NEW ELECTRICAL DEVICE BENEFITS DEAF PERSONS.

—An electrical device has re-
cently been patented which,
while small enough to be carried
conveniently in the pocket, is
said to afford very great assist-
ance to those who have been
unable to hear any but the loud-
est of sounds.

The phonophor, as this device
is called, consists mainly of a
small earpiece or receiver, weigh-
ing less than half an ounce and
fitting almost invisibly into the
outer ear passage, a small trans-
mitter, measuring 2 by 4 inches
and a little over a quarter of an
inch in thickness, a switch and
a small light battery of high
storage capacity. It is claimed
that this instrument enables the
deaf to hear the most subdued
musical sounds as well as con-
versational and public speaking,
without the faintest suggestion
of that tiny tone usually not-
iced in sound-transmitting in-
struments.

The idea of electrical hearing
aids is not new. Various con-
trivances have made their ap-
pearance for the last 15 years or
so, but have had many draw-
backs, such as the roaring and
missing sounds, caused by the ex-
cessive vibration of the large
diaphragm, coupled with the
general appearance of these con-
trivances with the large black
box receiver held to the head by
the heavy steel headband. In
the phonophor the earpiece fits
into the ear and, but for the
slender silk connecting cord, is
almost imperceptible. Even the
transmitter, that part which col-
lects the sounds, is carried com-
pletely hidden in a pocket with-
out materially impairing its func-
tion.

The elimination of the metallic
tones from the transmitted
sounds has been accomplished
by substituting a thin membrane
in place of the metal diaphragm,
an idea based upon the action
of the human ear drum.

JAPS HONOR GOD OF FIRE

How Peculiar Religious Observance is
Carried Out in Islands Ruled by
the Mikado.

A religious observance in Japan pecu-
liar to the coldest season of the
year is that of bathing in cold water
and wearing to and from the bath a
single kimono of pure white, with a
white band about the head.

The ceremony is out of respect to
Fudo San, the god of fire, primarily.
Those observing the custom carry a
lantern and jingle a small bell as
they go along the street. The sea-
son continues for 30 days.

The first 15 days of the season is
called the daiken, or great cold, and
the second 15 days the shokon, or
small cold. Most of those who go
through the ceremony are young
men, apprentices in some trade, who
run to and from the bath, repeating
the words, "Rokkon Shojo," as they
go.

The principal temple and bath is
the one in Fukawaga Ku. The cold
water bath there is open for women
only until 8 o'clock in the evening,
but at all hours in the day for men.

Among the women are many
young actresses, who pray earnestly
for success in their profession.

How Deadly Gas is Made Useful.

By mixing tear gas, developed for
war use, with deadly but odorless hy-
drocyanic acid, a powerful disinfect-
ant, the chemists of the chemical war-
fare service have made a combination
that can be used safely in sanitary
work. Since the hydrocyanic acid gas
kills the eggs of vermin as well as the
vermin, it is one of the most effec-
tive disinfectants known. As it has
no taste or smell and produces no dis-
comfort when breathed, the first indi-
cation of its presence in the atmos-
phere is the collapse of the person
breathing it. Tear gas is detected in-
stantly by its irritant effect on the
eyes even when the air contains only
minute amounts, and the combination
of the two can thus be escaped be-
fore the cyanide has a chance to act.

How Changes Affect Humanity.

Nations develop skill, prosperity,
power, for awhile; then retrograde,
while other nations develop.

The earth, first a ball of fire from the
sun, cooled a crust; huge vegetation
and animals developed. As the crust
thickened, less heat has diminished
size but increased qualities of plants,
animals, mankind. When the earth be-
comes too cool to supply ample susten-
ance the human race must retrograde.

Finally our solar system will be-
come a lifeless frozen waste. But
other systems will be developed some-
where in the universe.

How Wall Street Will Guard Funds.

The Wall street messenger boy who
loses or mislays the fortune in securi-
ties which is entrusted to him is soon
to be replaced by a bullet-proof ar-
mored car, carrying a chauffeur and
two armed guards, according to an
announcement by the National Sure-
ty company. No attempt will be made
by this firm to carry all of the finan-
cial district's securities, as only those
of its own patrons will be transported,
but it is believed that the move for
greater safety will be followed by
other concerns.

One minute a sultry, stifling
room—the next, swept by cool-
ing breezes, refreshed by the
magic of a G-E electric fan.

And this comfort costs so little
that you need not deny it to
yourself for a single day as the
current consumption amounts
to but a small fraction of a
cent an hour.

Letters To The Editor

The News is not responsible for the statements nor the sentiments in the following letters. This is the people's column and we reserve the liberty only of condensation and clarification where it is required. The editor of the News must know the authorship of every letter whether the author's name is published or not.

MAX COLWELL REPLIES
TO MR. HINTON'S LETTER

Editor Sierra Madre News: Last week a letter appeared in the News signed by Charles Richard Hinton, bitterly denouncing the entire Japanese race and particularly one Charles M. Nomura, business man and resident of Sierra Madre.

In answering the letter I do so because I feel that Mr. Hinton's accusations are not only unfounded, but are unjust to one of Sierra Madre's most loyal boosters.

In the first place, Mr. Hinton brands Charley Nomura as an undesirable alien, a subject of the Mikado, and in all a very objectionable character to the community. He lays considerable stress on how detrimental Mr. Nomura and the other Japanese are to Sierra Madre.

However, very unfortunately, he fails to give any reasons for his prejudiced opinions and leaves glaring statements hanging in midair without the slightest suggestion of proof to back them.

Mr. Hinton also states that his feelings against Mr. Nomura are not personal. If so, why, may I ask, are his statements so decidedly biased? He endeavors to picture this Japanese as a menace to our community and demands that his name be stricken from the list of Chamber of Commerce members. But in his flow of denunciations Mr. Hinton neglects to mention some few facts concerning Mr. Nomura's loyalty to this city and government. For some reason not a word was said about how many Liberty bonds and Red Cross memberships were taken and donations made to worthy causes by this same Charley Nomura.

Never has this community attempted to put over some plan of advancement but that Mr. Nomura has backed it to the limit. If Mr. Hinton, or any other, can show a record of equal worth, of it he may rightfully be proud.

Further, Mr. Hinton threatens to discontinue his membership in the Chamber of Commerce, and declares he will no longer support the organization for the betterment of Sierra Madre if Mr. Nomura is not ousted.

He calls upon the officers of the board to refund the amount of membership fees and to strike the Jap's name from the list.

If the officers of the Chamber of Commerce feel as I do in this matter they will immediately accept Mr. Hinton's offer to resign, for a man of that kind who cares so little for the welfare of this community, a man who makes threats against it, if his personal views are not carried out, is far more detrimental to the organization than helpful.

To make this beautiful city of Sierra Madre rank among the first in the nation its leaders must be made up of real broad minded men and must not harbor race agitators who would stir up resentment and ill feeling among its citizens.

MAX FOWLER COLWELL.

Lila Lee Wears
Bell Cuffs

HERE'S a summer style introduced by Lila Lee, movie star. Or rather, re-introduced, for enormous bell collars and cuffs were popular in the reign of Queen Anna some 200 years ago.

REPUBLICAN CONFERENCE
ENDORSES LINEBERGER

Jack Wright, Henry M. Lannan, L. E. Sharp, Earl Topping and F. D. R. Moote attended the conference in Pasadena on Wednesday, called to select a congressional candidate for the party primaries to be held on August 29. The conference voted unanimously to endorse the incumbent, Congressman W. F. Lineberger of Long Beach. The endorsement puts the stamp of approval of the party organization on Congressman Lineberger,

but does not preclude other candidates from trying for the nomination. Jesse R. Oastler of Sierra Madre announces that he will stay in the race, and former Congressman Charles H. Randall, a member of the Prohibition party, has also announced that he will try for the Republican nomination as well.

LifeLines

I PLANNED for many months to take a lengthy rest for my health's sake. Ah, that would be a treat! I dreamed about a restful place whose scenes all business would erase. I'd dodge the city's heat.

Let's see; there was the beach resort at which I knew I'd have much sport. I'd swim and loaf and fish. I'd even dance at evening time and sleep in air that was sublime. What more could fellow wish?

And then there was the good old farm where health and rest go arm in arm; where atmosphere is best. I'd love a summer trip like that but know no one will come to bat and ask me as a guest.

My third thought was a mountain trip where I could of the sky air sip, and breathe the evergreens. The climbing would be good for me and I would rest in ecstasy amid Dame Nature's scenes.

What pretty thoughts of summer rest! And yet they all were just a jest. Each dream just rose to fall. My coin ran short, 'tis said to state and I bowed down to rules of fate—and didn't go at all.

At home I spent my days of rest and really found that I possessed no great desire to roam. Real satisfaction grew on me and after two weeks I agree, there is no place like home.

*'Put up a little at a time
—the easy Lorain canning way*

HOME canning the old way always meant buying a great quantity of whatever fruit or vegetable you were putting up, and then spending scorching days in the kitchen, until the job was done.

Now you can do it an easier, better way. It is so simple and requires so little equipment and "getting ready" that you may can with an economy of time, work, and money. Thousands of women enjoy the Lorain way each summer.

This new easy way is the Lorain way. Read the recipe to see how simple it is. And berries, fruits, and vegetables put up by Lorain Oven Can-

ning keep their natural color, firmness, and fresh-from-the-garden taste much better.

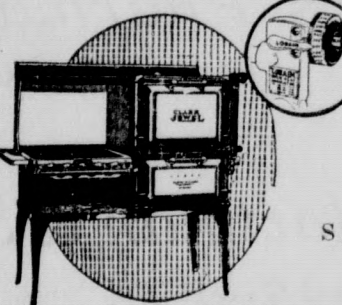

We want you to come in now and see our line of Lorain-equipped ranges, and get our copy of the free booklet, "Lorain Oven Canning." Let us demonstrate oven canning to you now. Don't delay!

LORAIN OVEN HEAT REGULATOR

The Lorain Oven Heat Regulator is an attachment of gas range ovens. It automatically keeps your oven at any one of 44 different temperatures. Simply set the "red wheel" for any heat you want. Changes in gas pressure, etc., do not affect the oven temperature.

CLARK JEWEL GAS RANGES

The baked-on finish of these ranges gives them a lustrous, durable surface that is as easy to keep clean as it is good to look at. All-steel construction prevents breakage. A variety of pleasing styles and convenient sizes to choose from.

Every Woman Loves to Paint

WHEN SHE KNOWS HOW—LET US TELL YOU

Painting is really fascinating work. Once you are started you'll probably not want to stop until you have re-finished many things you did not intend to do at first.

Perhaps some of your furniture, floors, woodwork or walls are beginning to look a little old—just on the surface. Pick out one or two things to re-finish. Tell us about them and how you want them to look when finished.

VOLUME 16, NO. 41

FRIDAY, JULY 14, 1922.

QUEER WEATHER

WHAT was the warmest day you ever experienced? The hottest place in America, curiously enough, is 2500 feet underground—in the mines of the Comstock Lode, Nev. The temperature there, nearly half a mile beneath the surface of the earth, is 145 degrees the year-round. The miners, while at work, have to be sprayed continually with cold water.

Above ground, America's warmest spot is Greenland Ranch in Death Valley, Cal. On July 19, 1913, the thermometer there registered 134 in the shade, and a summer heat of 125 degrees is quite common. Alfalfa farming, by the way, is carried on in this intense heat.

Think of Greenland Ranch and the Comstock Lode mines when summer heat "seems too much" for you.

THE human body has wonderful powers of adapting itself to weather and climate.

At the far extreme of hot Death Valley is Verkhoysansk, Siberia, the coldest spot on earth. Often it is 80 degrees below zero there, and the ground never thaws, remaining frozen to a depth of several hundred feet. In this intense cold, fur traders live the year round with their families.

Another peculiar weather spot is the town of Cherrapunjee, India, the wettest place on earth. It averages 458 inches of rainfall a year, and one year saw 905 inches.

Quite a contrast to the world's driest town—Cairo, Egypt, with only one inch of rainfall a year!

THE weather is the most fickle thing in life. That is why it is the basis of so much conversation.

Once in a while some one grudgingly admits that "It's a fine day." But mostly the weather is a subject of discontent. As a rhymster once put it:

As a rule, man's a fool.
When it's hot, he wants it cool.
When it's cool, he wants it hot—
Always wants it what it's not.
Man's a fool.

Incidentally, scientists find that people are most efficient—do their best work—in a temperature of 60 to 65 degrees.

FAMOUS DOG DEAD

Berkeley, Cal.—Baldy of Nome, famed for the races he won in Alaska, whose life he once saved. Baldy was 15 years old. He was two years old when Allan put in prose and verse, and for the twenty-eight malamute sons and grandsons he gave to France and the world war, was buried here recently. He died in a dog hospital of old age, winner six times.

and his final resting place is under the rose-bushes in the garden of "Scotty" Allan, whose life he once saved. Baldy was 15 years old. He was two years old when Allan put in prose and verse, and for the twenty-eight malamute sons and grandsons he gave to France and the world war, was buried here recently. He died in a dog hospital of old age, winner six times.

The Story of Our States

By JONATHAN BRACE
XXXVII.—NEBRASKA

THE Indian name for the Platte river was Nebraska, meaning "shallow water," and from this came the name of the state. A nickname for the state is the Blackwater State.

Of the early Spanish explorations little is known, except that Coronado probably reached the great plain of this region in 1541. More than one hundred and twenty-five years later Father Marquette noted the Platte river on his trip up the Missouri. In the beginning of the Nineteenth century the Lewis and Clark expedition skirted the boundaries of the present state and in 1805, Manuel Lisa established the first known settlement which was a fur trading post at Bellevue. This was just after the Louisiana Purchase had brought Nebraska into United States territory.

Omaha was established as a post of the American Fur company in 1825 and Nebraska City the following year.

With the California gold rush in 1849 many pioneers passed through Nebraska and some stopped and settled there although there was a law forbidding settlements among the Indians. The real colonization boom, however, started with the passing of the Kansas-Nebraska act in 1854, which arranged that these two sections should become free or slave states at the dictate of their inhabitants. The Nebraska territory was then organized and reached from the fortieth to the forty-ninth parallel. In 1861, the region north of 43 was made into Dakota territory. The Idaho territory was also created, which reduced Nebraska to its present size of 77,520 square miles, except for a slight addition in the Northwest which was made in 1882.

In 1867 Nebraska was admitted as the 37th state over the president's veto. It has eight presidential electors.

"RED CROWN" used exclusively in ANNUAL ECONOMY RUNS

The Los Angeles-Yosemite (Camp Curry) Economy Run is probably the most famous event of its kind in the motor world. Every year about the middle of May, while the snow still lies deep in the mountain passes, from 15 to 20 cars start the strenuous 360-mile run across the interior valleys and up the difficult mountain roads into the Yosemite Valley. Every car is carefully groomed for victory, and driven by an expert.

And in all the six runs so far held, all cars entered have used Red Crown gasoline exclusively.

This year the car making the run on the lowest consumption of fuel, a *Chevrolet driven by Dominick Basso, made the entire trip of 360 miles on 12 gallons of "Red Crown" (an average of 30 miles to the gallon), and a pint of Zerolene.

The average gasoline consumption for all cars participating was phenomenally low. This furnishes striking evidence of the continued success of this company in manufacturing a motor-car fuel of the highest grade, justifying for six successive years the unanimous choice of automotive engineers eager to establish the best possible records for their cars. This year, 18 of the 20 cars entered made the entire distance on less than 20 gallons of "Red Crown," although owing to recent rains the roads were unusually difficult.

Red Crown gasoline is the most economical motor fuel on the market today, because it contains the maximum number of heat units that can be rapidly and uniformly vaporized in the modern carburetor and go into complete combustion in the cylinders, producing the maximum power the engine was designed to develop.

Fill at the Red Crown sign—at Service Stations, garages and other dealers.

WHY SUFFER IN HOT WEATHER

Pointers by Thomas

These are trying times. Keep on trying.

Most any girl can get a man to teach her to swim.

The man who stands around waiting for something to break usually finds he does.

Days are getting shorter, but then the nights are getting longer.

When you see a dry cleaner with a happy smile, one of his customers has bought some white trousers.

What you don't know hurts you most when you try to tell it.

Strange things happen. We know a man who has been shaking hands 40 years and doesn't know how yet.

Sometimes the hardest thing to remember is to forget.

A bachelor changes his mind, but a married man often has his changed for him.

The biggest garages are not always back of the happiest homes.

Some crabs live in salt water; but the human crab lives in hot water.

Seven years of prosperity is predicted. Seven come eleven.

NOTICE TO CONTRACTORS

The Board of Trustees of the Sierra Madre City School District will receive sealed proposals for the following work to be done on the school buildings and grounds thereof: For an addition to the Domestic Science Building, for new roof on part and repair on other roofs of Main Building, cement paving on portions of grounds, Retaining wall across grounds, and drain pipes for water from buildings. Separate bids to be made on each of above items.

Plans and specifications are in the hands of Mr. Geo. S. Anderson, 375 Mariposa Ave., Sierra Madre, Calif.

The Board reserves the right to reject any or all bids and the contractor will be required to furnish an approved bond for 75 per cent of the contract price.

All bids must be in the hands of William Carson Shaw, chairman of the board by 2 o'clock p. m., July 21, 1922.

By order of the Board of Trustees.
Wm. Carson Shaw, chairman,
Ethel H. Hawks, clerk,
Geo. S. Anderson, trustee.
Dated June 27, 1922. 39-41

RADIO

MORE ABOUT VACUUM TUBE AS A DETECTOR

How a "Three-Electrode" Is Connected in a Simple Radio Receiving Circuit.

Obviously working the tube at a point on the upper bend of knee of the characteristic curve would produce the same symmetrical changes in the plate circuit by symmetrical changes in the grid potential as it will if the tube is worked at the lower end of

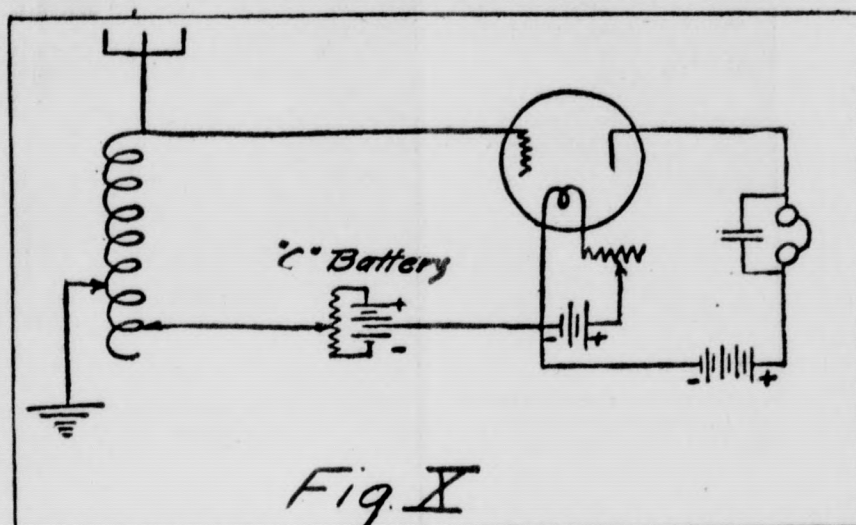

Fig. X

knee of the curve. However, the alternating current applied to the grid would now produce a large decrease and a small increase of the plate current, the reverse of that shown in Fig. 9. The objection to working the tube on the upper bend of knee of the curve is that when no potential is applied to the grid a relatively large

plate circuit current and the tube would not function as a detector.

Fig. 10 shows how a three-electrode vacuum tube is connected in a simple radio receiving circuit. The "B" battery furnishing the necessary plate potential is connected with its positive side through the phones to the plate. The filament is heated to the required temperature by the battery "A." The incoming radio frequency alternating current is applied to the grid and the negative side of the filament through the "C" battery. By connecting the negative side of the filament to the midpoint of the "C" battery a positive potential can be applied to the grid by moving the slider on the "C" battery potentiometer up, or the grid can be made negative with respect to the filament by moving the slider on the "C" battery potentiometer down.

In practice a "C" battery is not used to force a three-electrode vacuum tube to function as a detector.

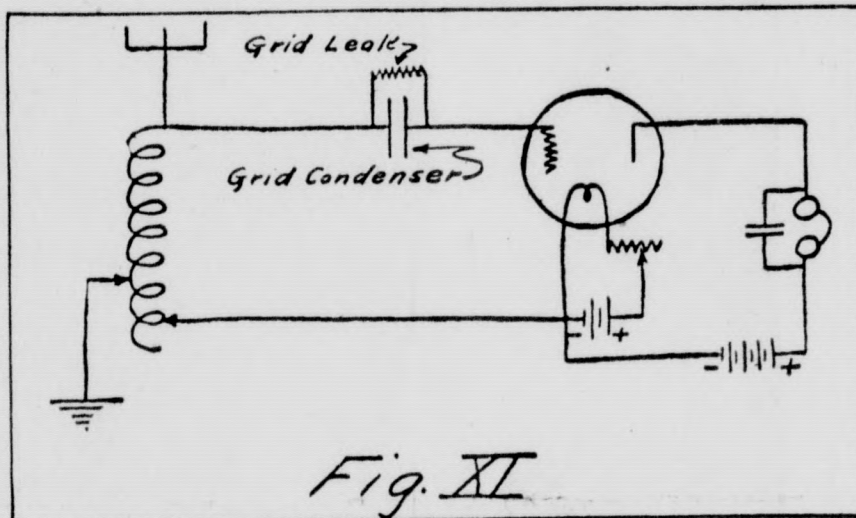

Fig. XI

current would flow in the plate circuit and rapidly exhaust the "B" battery.

Should the tube, by means of the potential applied to the grid, be made to operate at a point on the characteristic curve midway between the upper and lower bends—that is, on the straight part of the curve, symmetrical variations in the grid potential would cause symmetrical change in the

The grid condenser will allow alternating current to flow to the grid but will not allow any charge that might collect on the grid to flow through it to the filament. The only way a charge that might collect on the grid could flow to the filament would be through the high resistance of about 500,000 to 2,000,000 ohms and would allow the charge on the grid to leak off slowly.

USING ELECTRIC LIGHT WIRE

Experts Tell the Safe Way to Employ This System for Radio Receiving.

Since the announcement that the bureau of standards of the department of commerce had perfected a method of employing electric light wires in place of aerials, considerable experimenting has been done by various amateurs, some of whom have had good luck while others succeeded only in blowing a large number of fuses.

Engineers of an eastern electric light company have offered the following suggestions to amateurs:

"First—Successful results have been obtained so far only with audion bulb sets. Crystal sets receive the signals, but for some reason they are very weak and indistinct.

"Second—No set should be used on this system without air or oil filled condensers, placed in series with either the antenna circuit or the ground circuit—preferably in the antenna circuit.

"Third—A fuse not heavier than one-half ampere should be used in series and just ahead of the antenna connection.

"Fourth—An ordinary separate detachment plug—i. e., one with two blades connecting the two separate halves of the plug—is used. Only one wire is run from this plug, the other binding screw left undisturbed. This single conductor wire should be long enough to reach from a handy electric light socket to the table where the instrument is located and should terminate in the fuse mentioned above. In case an externally connected condenser is used, the circuit should be run from the fuse to the condenser and from the condenser to the antenna binding post of the receiving set.

"In sets where the condenser is built into the instrument the connection from the fuse is run directly to the antenna binding post. All other connections should be exactly the same as for conventional overhead aerial receiving.

"Screw the attachment plug into the electric light socket and tune as usual. In case no signals are received reverse the blades in the attachment plug by simply pulling the attachment

plug apart and turning the lower half half-way around.

"Caution—Under no consideration should the connection from the electric light socket be brought directly into contact with the ground connection, or fuses will be blown in the house circuit and the whole house left without light. Operators should also be careful about making contact themselves bodily with the electric light wire and ground at the same time, in order to avoid shock."

SHORT FLASHES

The first national radio compass station on the Great Lakes was recently installed. Other stations will shortly be in service when the "graveyard" of the lakes will have lost its terrors.

It is claimed that John Hayes Hammond, Jr., and Dr. E. L. Chaffee have invented an appliance that insures secrecy in wireless. The system is based on principle of producing characteristic waves to which only especially equipped receivers are responsive.

Secretary Hoover's force of "ether cops" may take the form of special government detecting stations where aerial compasses could be arranged so as to detect the direction from which interruptions come. By a series of relays, the government station nearest the violating amateur could be notified and the source of trouble stopped.

Now the fans in England are having a hard time with their air. According to a report from England there are only 8,000 authorized amateur operators in the United Kingdom. The London Daily Mail states that the reason for the art's tardy growth is the fact that "hampering and senseless restrictions in this country prevent wireless amateurs from getting practice. The old fogies of the army and navy air forces are afraid of the amateurs and use their influence in having the postoffice authorities impose impossible and vexatious restrictions that limit the field."

Why Chamber Commerce Dues Were Set at the Present Figure

Editor Sierra Madre News:

Every one knows that the Chamber of Commerce was re-organized last December and that efficiency experts in chamber of commerce work were called in from the outside to carry on the re-organization. This re-organization was conducted with the approval of the majority of the membership of the Chamber of Commerce and the Board of Directors at that time. As to how expert these outside men were has nothing to do with the commission they received. They were employed after a contract had been drawn up and signed by the men in question and the then president of the Chamber of Commerce and were thus entitled to the commission they received.

The above is reviewed merely to call attention to the fact that it is now a dead issue. They were paid in full, departed and have nothing whatever to do with nor have any claims whatsoever upon the Chamber of Commerce now or in the future.

The real purpose of this letter is to explain to the people of Sierra Madre why the dues of the Chamber of Commerce are set at the present figure.

The vast majority of intelligent and informed people all over the United States and other leading countries of the world expect and call upon the Chamber of Commerce in their own and other localities to furnish information and to further the betterment, advancement and improvement of its local community. And in view of the recognized importance of the Chamber of Commerce every worth while and every ambitious of being considered worth while city desires a Chamber of Commerce.

To have a Chamber of Commerce that operates effectively money must be raised to enable it to carry on its work. Since the only source of funds is its membership, the Chamber of Commerce must determine whether the funds will be raised by contributions, a combination of contributions and dues, or dues alone. The first is extremely hazardous and uncertain, and under it there is no assurance that operating expenses will be defrayed. The second is also doubtful and generally there are no funds for advertising and other forms of publicity. The last plan gives an assured income within certain limits and enables the Chamber of Commerce to arrange a budget and carry on its work in a systematic and business-like method. The Chamber of Commerce is a quasi-business institution and must observe business practices.

Having determined upon dues as the only satisfactory method of raising revenue, the next step is to determine the minimum operating expenses per year and the average membership that may hopefully be expected to raise this amount. By a simple arithmetical calculation the amount of dues are accordingly arrived at.

In Sierra Madre it works out this way. To operate our Chamber of Commerce efficiently and effectively we must have an annual income of at least \$4,000.00 and this is why:

*Pay of secretary \$150.00
Rent of office 30.00
Water rent 1.50
Electricity 1.00
Telephone, local and long dis. 5.00
Postage, stationery & office sup. 25.00
Total per month 212.50
Total for year 2550.00

* (The present secretary is receiving only \$75.00 per month.)

You will note that this covers only the barest operating expenses without any advertising or other publicity matter. Actually operating expenses will run over the amount stated above if the Chamber of Commerce is to do satisfactorily the work it is called upon to do. Moreover, the office of the Chamber of Commerce needs to be better furnished than it is to produce a satisfactory effect upon our townspeople and visitors. The Chamber of Commerce is the show window of the community and a just estimate of the nature of a city may be made from the appearance of and the treatment accorded a visitor by the Chamber of Commerce. Continuous advertising through the various media must be conducted to keep Sierra Madre "on the map" and to let the world at large know that we are a progressive community and that our city is the place they want to come to live. This costs in dollars and cents and no niggardly amount will produce the desired results.

Since you will agree that the amount set is necessary for the maintenance of the Chamber of Commerce, the next step is to determine how to raise it. Eight hundred members at \$5.00 per year, 400 at \$10.00 per year or 200 at \$20.00 would produce the funds required. To have \$5.00 dues would mean that practically the head of every family would have to contribute to the support of the Chamber of Commerce. At \$10.00 we would have to have the head of every other family in the Chamber of Commerce; you must agree that this, too, is impracticable. Hence the only alternative is to place the dues at \$20.00 and strive for a membership of 200. This has the further advantage that it does not exhaust the possibilities of membership and leaves a further field for recruiting as the work of the Chamber grows as it must and will.

We must ask your indulgence, Mr. Editor, and that of your readers for having set the matter forth at such length, but we feel that the citizens of Sierra Madre are entitled to know why the dues of the Chamber of Commerce are the amount set. And further, we beg to state that "every penny stays at home."

Yours very truly,

C. S. FLOYD,

Secretary Sierra Madre Chamber of Commerce.
